

3EA Whitepaper

3rdeyeadvisors Token (3EA)

Awaken Awareness. Recode the System.

Version 1.0 — Q4 2025
© 2025 3rdeyeadvisors

1. Introduction

3rdeyeadvisors was founded with a simple vision: to make financial knowledge and decentralized tools accessible to everyone. Traditional finance often creates barriers — through complexity, high costs, and exclusivity. At the same time, decentralized finance (DeFi) offers powerful opportunities, but can be confusing without the right guidance.

The 3EA token is at the heart of the 3rdeyeadvisors ecosystem, designed to combine education, rewards, and decentralized finance access into one unified experience.

2. The Problem

Despite living in the most connected era in history, financial empowerment remains out of reach for most people.

- Traditional Finance is exclusive by design. Hidden fees, high barriers to entry, and centralized control leave everyday people locked out of opportunities that institutions exploit daily. For many, even opening an investment account or qualifying for credit feels like navigating a maze built to confuse.
- Financial education is almost nonexistent. According to global surveys, less than 1 in 3 adults are considered financially literate. Schools rarely teach budgeting, credit, or investing — leaving millions unprepared to manage debt, save for retirement, or participate in modern financial markets. The gap is generational, and it's widening.
- The DeFi paradox. Decentralized finance was meant to unlock access for everyone. Instead, it often feels intimidating and technical. Wallet setups, gas fees, and endless protocols overwhelm beginners, creating a new digital divide where only insiders and "crypto-natives" thrive.
- Trust is at an all-time low. Major bank collapses, predatory lending, and overleveraged financial institutions have left people disillusioned. Meanwhile, scams and rug pulls in crypto damage confidence in the very alternative meant to empower individuals.

The result? Most people are stuck between two broken systems: an old world that shuts them out, and a new world that confuses them.

3. The Solution — The 3EA Ecosystem

3rdeyeadvisors exists to bridge that gap — to create a space where financial knowledge and decentralized access come together.

- Demystifying finance. Our platform makes financial education clear, relatable, and actionable. From the basics of credit to the complexities of DeFi, we turn confusion into clarity.
- Making DeFi human. By simplifying access through NFT passes and structured vaults, we transform decentralized finance from intimidating to approachable. Users don't just learn about strategies — they can participate in them with confidence.
- Building trust through transparency. With the 3EA token governed by a Safe multisig and tokenomics published openly, trust isn't demanded — it's earned. Our community can verify ownership, track treasury use, and contribute to decision-making.
- Rewarding participation. Instead of learning being a one-way street, users are rewarded for growth, engagement, and contribution. Knowledge becomes currency, and participation strengthens the whole ecosystem.

The 3EA token isn't just a digital asset — it's the foundation of a movement to make finance accessible, transparent, and empowering for everyone.

4. The 3EA Token

Name: 3rdeyeadvisors Symbol: 3EA Network: Base (Ethereum Layer-2) Supply: Fixed at 1,000,000 tokens Decimals: 18 Contract Owner: Multisig Safe (Base Mainnet)

Utilities of 3EA include:

- Unlocking premium courses and DeFi education resources
- Access to gated vault strategies (Earth, Sky, Cosmos) via NFT ownership
- Rewards for participation and engagement
- Future role in governance proposals and community input

5. Tokenomics

Total Supply: 1,000,000 3EA tokens

- 40% (400,000) → Community Rewards & Loyalty
- 25% (250,000) → Ecosystem Treasury (growth, partnerships, sustainability)
- 15% (150,000) → Team & Development (current & future contributors)
- 10% (100,000) → Liquidity Pools (DEX on Base for trading)
- 10% (100,000) → Education Incentives (free course access, learn-to-earn rewards)

This allocation ensures sustainability, community participation, and long-term growth.

6. Roadmap

Q4 2025 - Launch of 3EA Token on Base Mainnet - BaseScan verification & explorer visibility
- Whitepaper publication and initial token listings (CoinGecko, CMC, wallets)

Q1 2026 - Launch of NFT Vaults: Earth, Sky, and Cosmos - Begin distribution of loyalty and community rewards

Q2 2026 - Expansion of educational content and learn-to-earn incentives - Growth of the 3reyearadvisors course library and DeFi guides

Q3–Q4 2026 - Governance features: community proposals and Safe-managed voting - Expansion of ecosystem utilities, including new DeFi vault strategies and potential cross-chain integrations

7. Future Expansions

While 3EA is the core ecosystem token, the roadmap also includes the introduction of additional layers:

- Wisdom Tokens (Rewards): a reward system for loyalty and community engagement. These may be implemented as a separate ERC-20 token or as off-chain points, convertible into ecosystem benefits.
- Governance Layer: a future governance system where voting rights may be assigned through either a separate governance token or governance-enabled NFTs. This ensures that governance is transparent and does not affect the fixed supply of 3EA.

8. Governance

From launch, the 3EA token contract will be owned by a Safe multisig to ensure security and decentralization. As governance expands, token holders will play a role in decision-making around ecosystem upgrades, treasury usage, and new feature rollouts, with future mechanisms providing even more community involvement.

9. Disclaimer

3EA and the 3rdeyeadvisors ecosystem are educational in nature and do not provide financial advice. Participation in DeFi and cryptocurrency carries risk, including potential loss of capital. Users should always conduct their own research before making financial decisions. The 3EA token is not intended as an investment security; it is a utility token supporting the educational and DeFi services of the 3rdeyeadvisors ecosystem.
